

CUSTOM PRINTED ELECTRONIC FILE REQUIREMENTS

Large Format Printing on FenceScreen

1.888.313.6313

PREFERRED FILE TYPES:

- High Resolution TIFF, JPEG, or PSD for raster based art, or "vector art" such as Adobe Illustrator.
- Graphic files should be built at 1/12th scale (1 inch per 1 foot of actual final output size).
Raster based art (tiff, jpeg, psd, etc.) should be 300 dpi at 1/12th scale.

Example: Final logo or artwork size will be output 10' wide by 6' high.
Artwork should be built 10" x 6" @ 300 DPI

- Vector art can be scaled to any size and provides the best result.
- High resolution pdfs are acceptable, but may need conversion before output.

We can accept and work with a variety of types and formats, but may incur additional graphic production charges for conversion to standard types for output. We can also work with full layout files if collected with all links and fonts, but may incur additional charges to work with. Additional graphic production services such as recreating (simple) logos, resetting type, etc. are available for an hourly charge, depending on complexity.

You can call our graphics department for more detailed file format and setup questions or email us at:
artwork@fencescreen.com

COLOR REQUIREMENTS:

- FenceScreen print standard is calibrated, process CMYK color.
- We can accept files in RGB and Pantone colors, but will be converted to CMYK prior to output.
Color shift may occur during the conversion to CMYK, since CMYK cannot print the full range of RGB or Pantone colors.

We provide electronic pdf proofs for approval, however different monitors and printers vary dramatically in their color settings and calibration, **SO ALL COLORS ARE APPROXIMATES ONLY AND EXACT COLOR MATCHING CANNOT BE GUARANTEED.**

SENDING FILES:

- Files under 10mb in size can be sent via email to artwork@fencescreen.com, or use the following web upload link:
<https://dropbox.yousendit.com/FenceScreenDropbox>

Simply fill in your information in the boxes and link to your files to upload to us. A confirmation email will be sent to both parties acknowledging the transfer.

- For larger files, use the web upload link: **<https://dropbox.yousendit.com/FenceScreenDropbox>**

SOFTWARE:

- **FENCESCREEN PRIMARILY UTILIZES ADOBE CS6 SOFTWARE**

We can accept and work with most standard file types, both MAC and PC including:

Adobe Photoshop (CS6 or below)
Adobe Illustrator (CS6 or below)
Adobe Acrobat (CS6 or below)
Adobe InDesign (CS6 or below)
QuarkXPress (v8 or below)

Less Recommended (may incur additional costs)

Microsoft Word or PowerPoint
Other CAD or vector based files
